INDEX TO VOLUME XII

Adams, J. F. The sphere, considered as an H-space mod p . 52

Barcus, W. D. A note on free modules over the Steenrod algebra 159

—— On the cohomology of an Eilenberg–Maclane space . . 268

Bhatia, R., and **Chaundy, T. W.** Kummer's principle . . 134

Chao Ko, see **Erdős, P.**

Chaundy, T. W., see **Bhatia, R.**

Davenport, H., Lewis, D. J., and **Schinzel, A.** Equations of the form $f(x) = g(y)$ 304

Epstein, D. B. A. Finite presentations of groups and 3-manifolds 205

Erdős, P., Chao Ko, and **Rado, R.** Intersection theorems for systems of finite sets 313

Good, I. J. The colleague matrix, a Chebyshev analogue of the companion matrix 61

—— Analysis of cumulative sums by multiple contour integration 115

Gordon, B. Some identities in combinatorial analysis . . 285

Hammersley, J. M. On the rate of convergence to the connective constant of the hypercubical lattice 250

Hardie, K. A. A generalization of the Hopf construction . . 196

—— Higher Whitehead products 241

Keogh, F. R., and **Petersen, G. M.** Riesz summability of subsequences 33

Kingman, J. F. C. On an inequality in partial averages . . 78

—— A convexity property of positive matrices 283

Kirby, D. The genus of an algebraic curve 217

Lewis, D. J., see **Davenport, H.**

Linden, C. N. Minimum modulus theorems for functions regular in the unit circle 1

McCarthy, P. J. Approximate location of the zeros of generalized Bessel polynomials 265

McLeod, J. B. The determination of phase shift 17

—— The determination of the transmission coefficient . . . 153

—— Eigenfunction expansions associated with a complex differential operator of the second order 291

Morris, A. O. The spin representation of the compound and induced matrices of an orthogonal matrix 69

Morris, A. O. Spin representation of a direct sum and a direct product (II) 169

Parsons, D. H. Singular systems of an even number of partial differential equations, of maximum rank 213

Patterson, E. M. On regular automorphisms of certain classes of rings 127

Petersen, G. M., see **Keogh, F. R.**

Prasad, S. N. Function to sequence mapping 45

—— Strong projective convergence in function spaces . . . 177

—— On transformations of functions and function spaces . . 185

Rado, R., see **Erdős, P.**

Ruben, H. A multidimensional generalization of the inverse sine function 257

Schinzel, A., see **Davenport, H.**

Smith, R. A. Asymptotic stability of $x''+a(t)x'+x=0$ . . 123

Temple, G. A property of simply transitive groups . . . 161

Titchmarsh, E. C. On the nature of the spectrum in problems of relativistic quantum mechanics 227

Vembu, S. Fourier transformation of the n-dimensional radial delta function 165

White, A. J. On quasi-Cesàro summability 81

—— On Cesàro and quasi-Cesàro summability of Fourier series . 100

Wilson, R. The behaviour of a function near an isolated essential point and that of its coefficient function near infinity . . 145
